[My portfolio >](#)

Objective

I am a recent Information Technology graduate from Greenwich University Vietnam with a strong aspiration to become a .NET Backend Developer. My short-term goal is to develop solid technical skills and contribute effectively as a Junior .NET Developer within the next year. Looking ahead, I aim to progress to a Mid-Level Developer role within two years, taking on greater responsibilities, optimizing business solutions, and adding more value to the team.

Skills

Coding Languages:

C#
JavaScript
HTML/CSS

Frameworks Systems:

ASP.NET
ReactJS

Database:

MS SQL Server
MySQL

Tools:

GitHub, Jira, Postman,
Swagger

Other:

- Good understanding of OOP methodologies, SOLID principles, design patterns
- Using project management tools (Jira, Github)
- Be able to applied Software Development Life Cycle Models (Scrum, Agile)
- Self-learning and Critical thinking skills
- Experienced in applying Design Patterns for scalable and maintainable code.

Education&Experience

University of Greenwich
Information Technology
2021 - 2025

Developer at Devplus
ReactJS internship
2025

English
Vstep B1
2025

Project

GREEN PREP FEBRUARY 2025 - MARCH 2025

Team size: 20

My position: Developer ReactJS

Description

GreenPrep is a secure online examination platform developed to serve university courses, supporting around 1000 students. The system ensures a fair testing environment with advanced anti-cheating mechanisms.

- Developed the Common Remain Timer component
- Designed and built the Reading test interface, handling the most complex part of the English exam system.
- Tackled complex UI and state management challenges to ensure seamless interaction between different question types within the same test.
- Worked closely with QA and backend teams to test, debug, and optimize exam flow under high concurrency (up to 1000 users).

Technology description

Front-End: ReactJS, TailwindCSS, Ant Design
State Management: Redux Toolkit
Tools: Jira, Github, Slack, Swagger

GREEN PREP - Admin MARCH 2025 - APRIL 2025

Team size: 20

My position: Developer ReactJS

Description

GreenPrep-Admin is an administrative dashboard for university staff and lecturers to manage courses, monitor student activities, and generate detailed reports. It offers powerful tools to create, update, and organize educational resources.

- Took the lead in analyzing large functional requirements and breaking them down into smaller, manageable tasks for the team.
- Built reusable and scalable UI components to accelerate development and ensure consistency across different pages.
- Worked closely with team members, reviewed pull requests, and provided technical guidance to ensure clean, maintainable codebase and UI/UX consistency.

Technology description

Front-End: ReactJS, TailwindCSS, Ant Design
State Management: Redux Toolkit
Tools: Jira, Github, Slack, Swagger

MAGAZINE CMS MARCH 3, 2024 - APRIL 19, 2024

Team size: 7

My position: Developer, UI/UX, Data, Tester

Description

A secure, role-based web platform for managing student contributions to an annual university magazine. Features include submission management, content review, and communication tools. Developed using Agile Scrum.

- Students submit, read, edit delete contribution
- Coordinator create blog - read, delete and confirm the contribution
- Admin management accounts such as create and lock account - manage blog

Technology description

Front End: Bootstrap
Back End: .Net core mvc
